

LASER
TOOLS CO., INC.

SE-50 Solar Energy Installation System

- Long Distance Alignments
- Use for Installing Solar Panel Support Pylons
- Use for Job Site Surveys

AP100TAN

GLX350-10

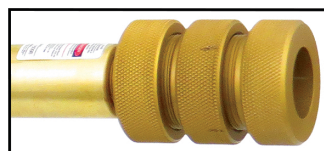

AP100B

SE-50 Solar Energy Installation System includes:

- 1-GLX350-10 Green Beam Alignment Laser that shoots a laser beam over 1,000'
 - Requires only 6 AA Alkaline Batteries for over 30 hours of continuous operation and is waterproof. This means the laser can be used in high humidity environments like rain, snow and fog.
- 1-AP100B Leveling Adapter Plate with 9/16"-32 Threaded Leveling Legs for fine vertical adjustments.
 - This means that the green laser dot can be positioned on target at over 500' and provide a laser reference line aligning and installing PV Panel Support Pylons. Made from 6061-T6 Aluminum, Hard Anodized.
- 1-AP100PLT Leveling Adapter Mounting Plate. Includes 5/8-11tpi threaded hole for tripod mounting and securing Threaded Leveling Legs. Made from 6061-T6 Aluminum, Hard Anodized.
- 1-AP100TAN Tangent Adapter Ring that provides precise horizontal azimuth adjustments for laser dot positioning.
 - This means that the laser dot can be moved left and right with a single adjustment screw and spring-loaded counter force.
- 1-AP351 1" Ring Set for Dovetail Mounting the 1" Diameter GLX350-10 Alignment Laser.
- 1-AP353A 5" Magnetic Mounting Block with AP92 Shoulder Pin for 360° rotation. Includes 2 - 45 minute level vials. Made from 6061-T6 Aluminum, Hard Anodized.
- 1-AP46 Hard Shell, Foam Filled Carrying Case.

Optional Accessory:

WP59 Fine Beam Adjustment Optics

Specifications:

Class IIIa (IEC 3R) <5mW @ 520nm
Power: 9VDC, uses 6AA Alkaline Batteries
Case: Solid Brass, IP67 Water Resistant
